Kit,

Please be advised that from internal discussions at the Division we have determined that if Horizon Mine elects to continue disposal of their gray water at the consumers septic system, this septic system would need to be permitted by the Division and incorporated as part of your permit area. Documentation would be necessary to show evidence that this system is approved and sized for this activity by the Department of Health.

The Division upon receipt of the documentation that you mailed (truck tickets and load sizes delivered to consumers septic system) will review the information provided and make a determination as to what action to take at that time.

If Horizon elects to dispose of their gray water at a authorized commercial facility this is an acceptable practice with the Division. Please notify the Division of your decision as soon as possible.

Failure to rectify the problem in a timely manner will result in enforcement action.

Thanks,
Karl
